

What is BEER Token?

Stellar BEER Token is a digital currency designed for hospitality, food, beverage, sports, and gaming industries. BEER Token can be used between people and businesses, and sent instantly to anyone, anywhere in the world, in seconds.

BEER Token Features

Secure Stellar Network, which powers BEER Token and many others, is the most secure and advanced blockchain system in the world.

100% Private BEER Token is only available through Stellar wallets and exchanges. You alone control your assets, no other middleman, bank, or intermediary is required, nor is the exchange of any personal information necessary. Payments and transfers with BEER Token and other Stellar assets on the network, are done directly between the sender and receiver of the tokens.

Exchangeable As a verified Stellar Asset, BEER Token is exchangeable with many Stellar crypto assets in the Stellar Network.

Seamless Transfers BEER Token can be directly transferred to anyone anywhere in the world, without restriction or 3rd party intervention.

Lightning-Fast Sending, swapping, or trading BEER Token or any asset on the Stellar Network is almost instant and takes only a few seconds to send or receive funds across the network.

Lowest Fees Whether sending \$1.00 or \$100M in BEER, fees for using Stellar Network are extremely low. The average transaction fee is around 0.00001 XLM, the maximum is 0.001 XLM per transaction, regardless of the amount, the fee equates to less than a few cents.

Green Being part of the Stellar Blockchain Network makes BEER Token a green, efficient, and sustainable digital asset compared to others like Doge & BTC.

HOW TO BUY BEER Token.

To get started, first you need to purchase XLM, the base currency for the Stellar Network. You can purchase XLM through Stellar Wallets like LOBSTR, a secure, easy, and convenient crypto wallet for getting started with Stellar and BEER Token or you can go through a crypto exchange like Coinbase.

Lobstr offers a user-friendly interface that is easy to navigate which makes it very simple to send, receive, buy, swap, sell or trade BEER Token and Stellar assets.

<https://www.lobstr.co>

Sending & Receiving Stellar BEER Token with LOBSTR Wallet.

Step 1

Download Lobstr Wallet from the Apple Store or Google Play store or visit lobstr.co to signup online. Write down your security words and create a unique Stellar Address that you can send and receive funds from.

Step 2

Fund your account with Stellar XLM. Either purchase XLM from within Lobstr, or transfer XLM from your crypto exchange account.

Step 3

Add BEER as an asset in Lobstr. Click on ASSETS in the left menu and click on the + icon. Scan the QR Code below or search for beer.stellarmint.io

Step 4

If you are *receiving* BEER from someone, that's all you need to do.

Step 5

If you are *sending* BEER to someone: Swap or Trade XLM with BEER. Click SEND, add the recipient's Stellar or Federation Address, select BEER Token from your asset list, enter the amount of BEER Token you want to send. Click SEND.

Purchasing Stellar Lumens (XLM) and funding your Lobstr Wallet

What is the Stellar Network?

Stellar is a fast, efficient network for trading, saving, and spending digital money. Stellar Network powers BEER Token as well as many other native tokens and enables anyone to send money anywhere affordably and quickly. The Stellar Network is great for trading any kind of money or representation of value in a low cost, environmentally friendly, transparent, and efficient way.

What are Stellar Lumens (XLM)

Lumens, also known as XLM, is the base currency for the Stellar Network. It uses XLM for network transaction fees and to convert funds from one currency to another.

<https://stellar.org>

Buying Lumens (XLM)

Option 1 - In-Lobstr via MoonPay

Stellar Lumens (XLM) can be purchased directly from within Lobstr with Visa and Mastercard debit or credit cards, purchases are processed via MoonPay. The minimum amount of Stellar Lumens (XLM) you can purchase is \$30 to a maximum of \$2000.

<https://support.moonpay.com/>

Option 2 - Crypto exchange.

Another common method for purchasing Lumens (XLM) is via a crypto exchange, which allows you to buy, trade, swap many crypto currencies. You would purchase XLM on the exchange and then send them to your Stellar Address in Lobstr.

Exchanges have different requirements depending on your country, some have a signup procedure known as Know Your Customer (KYC) which requires submission of Photo ID and other verification details.

Once you have completed the signup procedure and set up an account in your country, you would fund it, and deposit dollars, which in turn you would convert to XLM by swapping or trading. Once you have purchased XLM, you would send it to the Stellar address linked to your Lobstr Wallet.

Which Crypto Exchange to use?

The requirements and signup process for exchanges is different for each country. It is best to start with a simple online search. Do Your Own Research (DYOR) for Crypto Exchanges in your country to find the most popular, trustworthy, and secure.
